

# Ethernet Pre-Order Questionnaire

Please provide the requested information to assist in the provisioning of your order and return to your dedicated Order Manager.

### Service Address:

Street Address: Enter street address  
 Building: Enter building; if only one, enter "Main"  
 Floor: Enter floor; if only one, enter "First"  
 Room/Suite: Enter room/suite/unit of network equipment  
 City, State, Zip: Enter city, state, zip

### Shipping Address:

Attention: Enter contact receiving equipment  
 Shipping Address: Enter Street Address/City/State/Zip

### Local On-Site Contact:

- Contact **must** be local to site and be able to grant access to telco MPOE (where the main electrical/telco comes into building) and customer's network area:

Name: Name  
 Phone Number: Phone Number                      Email: Email

### Building Information:

Is this building controlled by a separate riser/management entity?                      Yes   No  
 • If yes, provide contact information: Riser Contact Name, Number, Email  
 Is there available backboard space at the MPOE?                      Yes   No  
 Is there available power and ground bar at the MPOE?                      Yes   No

### Technical Details:

The carrier will install the circuit at the MPOE of the building, handing off on a Fiber interface. A managed router will connect to the customers suite via the Fiber handoff from the carrier. The customer/building management is responsible for and charges associated with completing the inside wiring to extend the service between the MPOE and their suite, whether hiring Bullseye or using a 3<sup>rd</sup> party.

- If a fiber extension is required from MPOE to the customer's suite, how would you like this installed?
- Customer/Building Management will run (Fiber details provided after carrier circuit install)
  - Bullseye will run (This will need to be quoted out separately and a Site Survey may be required)

Who is the customer's technical contact for this order if additional information is needed for BullsEye?

Name: Name  
 Phone Number: Phone Number                      Email: Email

### Carrier Handoff (Non-Standard Configuration)

If the default Single Mode Fiber handoff with an LC connector is not able to be used, please write in what is to be ordered from the carrier, \_\_\_\_\_.
